DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tadashi.

The patent by Tadashi (JP 10-266855) shows a hybrid vehicle with an internal combustion engine (20) for driving the vehicle. A motor (21) as a power source for driving the hybrid vehicle together with the internal combustion engine. A motor control device (23) for controlling an operation of the motor. A cooling apparatus for the hybrid vehicle includes a cooling circuit (24, 25) for cooling the internal combustion engine and the motor control device by common coolant. A management temperature of the coolant at the internal combustion engine and a management temperature of the coolant at the motor control device are independently determined.

The patent by Tadashi does not show a temperature setting device for determining the independent management temperatures. It is the view of the examiner that because each of the circuits are independently cooled it would be an obvious choice of design to use a temperature setting apparatus or thermostat to control each circuit.

Art Unit: 3747

A plurality of flow paths is provided on the radiator for radiating heat of the internal combustion engine and the motor control device.

Allowable Subject Matter

Claims 5-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
